

ADS BIOTEC ACQUIRES GENIAL LABORATORY AUTOMATION

Strengthens its global leadership and broadens its portfolio of automated instruments and consumables for the cytogenetic, pathology and research laboratories.

November 3rd, 2016 – Omaha, NE: ADS Biotec, a global leader in development of automated instruments and consumables for use in cytogenetic, pathology and research laboratories announced that it has acquired Genial Laboratory Automation, the instruments division of Genial Genetics, based in Chester, UK.

” The acquisition of Genial Laboratory Automation strengthens our product portfolio and expands our global reach in bringing optimized performance, convenience and consistent performance to Cytogenetic laboratories” said Vijay Dube, President and CEO of ADS Biotec. He further added that “we look forward to close collaboration with Genial Genetics as we continue to support the worldwide customer base for Genial products”.

Lawrence Crees, Founder and Managing Director of Genial Genetics stated “The acquisition of Genial’s instrument division by ADS Biotec will provide real benefits to Genial’s instrument product customers and users by providing ready access to ADS Biotec’s world-class customer support and their broad and innovative portfolios of product offerings. We are fully aligned with ADS Biotec and will be maintaining an extremely close collaboration with them throughout and beyond the integration process”

About ADS Biotec
